reskyprabowo.my.id | github.com/Resky89 | Ciawi, Bogor, Jawa Barat

Fullstack Developer and recent Informatics Engineering graduate who builds web and mobile systems for real operational problems. At RS UMMI Bogor, I built the Laravel frontend for a Hospital Asset Management System and connected it to a REST API in Express.js, covering asset tracking, procurement, and depreciation workflows. I also ship projects end-to-end, like WarisanQ, a Sharia inheritance calculator built with Next.js and TypeScript, with a Swagger-documented REST API and PDF report generation. Skilled in React.js, Next.js, Flutter, Laravel, and Express.js, with a growing focus on backend architecture.

Education

Binaniaga Indonesia University - Bogor, Indonesia — Sep 2022 - Aug 2026
Bachelor of Informatics Engineering, 3.87/4.00

SMK Penerbangan Techno Terapan Makassar - Makassar, Indonesia — 2019 - 2022
High School Diploma in Computer and Network Engineering

Work Experience

RS UMMI Bogor - Bogor, Indonesia — Feb 2025 - Jul 2025
Frontend Developer Intern

- Designed and developed the initial UI/UX wireframes and prototypes for the Hospital Asset Management System across both web and mobile platforms, focusing on an intuitive and user-centric experience for hospital staff.
- Integrated Laravel frontend components with an Express.js REST API for real-time data sync, improving accuracy and consistency of asset tracking across devices.
- Authored a comprehensive manual book and system documentation detailing step-by-step operational workflows and user guides to streamline the onboarding and training process for end-users.

Pusat Pengendalian Pembangunan Ekoregion Sulawesi & Maluku - Makassar, Indonesia — Dec 2021 - Feb 2022
Administrative Intern

- Responsible for managing and maintaining the Personnel Management Information System (SIMPEG) application at the Sulawesi and Maluku Ecoregion Development Control Center.
- Archived documents, managed inventory, and monitored as well as compiled financial reports for the Sulawesi and Maluku Ecoregion Development Control Center.

Projects

WarisanQ - Sharia Inheritance Calculator
Frontend Developer
Next.js 16, TypeScript, Tailwind CSS, React Flow • *Github* • *View*

- Built an interactive Sharia inheritance calculator supporting two legal references (Syafi'i fiqh and Indonesia's Kompilasi Hukum Islam), including edge cases like Aul, Radd, Gharrawain, and Musyarakah, with an interactive family-tree visualization via React Flow.
- Designed and documented a REST API with Swagger UI for third-party integration, plus automatic PDF report generation.

Simaru - Hospital Asset Management System
Frontend Developer - Intern | Laravel, PHP, Tailwind CSS • *Github*

- Built core modules for full asset lifecycle management: master asset data, depreciation, mutation, calibration scheduling, and maintenance/repair complaints, with role-based access control (RBAC) across staff and admin roles.
- Developed a procurement workflow covering price comparison, purchase orders, and goods-receipt tracking, with finance and asset-opname reports exported to PDF.

Soccer School Management - Admin App
Frontend Developer - university coursework | Flutter, Dart • *Github*

- Built the Flutter admin app for soccer school staff to manage coaches, team categories, and schedules.
- Developed a configurable assessment system covering aspects, sub-aspects, and point-based rating criteria, integrated with the team's REST API for authentication and data.

Delimart - Inventory Management System
Frontend Developer - university coursework | Laravel, PHP, Bootstrap,Tailwind CSS • *Github*

- Built the web interface for a Laravel-based inventory management system covering products, categories, suppliers, and mobile credit (pulsa) sales, with role-based admin access and a metrics dashboard.
- Added stock, discount, and supplier management views with search and pagination across all modules.

Organizational Experience

Pemilihan Raya Mahasiswa (Pemira) - **Bogor, Indonesia** Apr 2024 - May 2024

Event Committee

- Planned and structured comprehensive event rundowns for the Student Presidential (Capresma & Cawapresma) debates and the main voting day, ensuring a logical and engaging flow of activities.
- Managed and oversaw the execution of both the debate sessions and the general voting process, coordinating closely with the team to ensure all events ran smoothly, securely, and on schedule.

TECHKERS (Technology SMK Penerbangan Techno Terapan Makassar) - **Makassar, Indonesia** 2020 - 2022

Multimedia Coordinator

- Developed and curated comprehensive learning modules focusing on video editing and graphic design to enhance the technical skills of the multimedia division members.
- Facilitated knowledge sharing and guided team members in utilizing multimedia tools and creative workflows effectively for various organizational projects.

Skills

- **Frontend**: JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Flutter, Dart
- **Backend & Database**: PHP, Laravel, Express.js, FastAPI, Flask, MySQL, RESTful API, Swagger/OpenAPI, Role-Based Access Control (RBAC)
- **Design & Prototyping**: Figma, Adobe Premiere Pro, After Effects, Illustrator, Photoshop, CorelDRAW, Canva
- **Tools**: Git, Docker, Postman, Microsoft Office Suite
- **Languages**: Indonesian (Native), English (Conversational)
